FRONTEND DEVELOPER

Highly analytical and solution-oriented software developer with extensive experience in frontend development. I have worked as a vital team member in developing a remittance app that helps people seamlessly make foreign payments and convert currencies, all in one place. Additionally, one of my biggest achievements was helping the company successfully deploy a HR management system which has helped the company millions monthly from using a third-party HR platform.

KEY COMPETENCIES

- React
- Next.js
- TypeScript
- REST API integration
- Axios and react query
- Framer motionn
- Tsup, Webpack, Parcel
- Ladle, Storybook

- State management with Jotai, Zustad, Redux

- oAuth
  Jest, Cypress
-

- Wordpress
- Google map integration
- Tailwind, MantineUI, MaterialUI, ChakraUI, Ant Design, Shadcn, RizzUI
- Data Visualization with Recharts, TradingView Chart.
- Langchain, AI
- NPM publishing
- React Native, Expo

PROFESSIONAL EXPERIENCE

Mabilla Group Limited - Frontend Engineer- January 2025 - Present
Developed and maintained secure, scalable frontend interfaces for fintech applications, including remittance platforms, utility payment systems, virtual card services, and currency exchange tools. Integrated RESTful APIs for real-time transactions. Implemented security best practices (XSS, CSRF prevention, PII encryption). Collaborated with cross-functional teams to deliver responsive, user-friendly web applications using modern JavaScript frameworks.

AFEX - Frontend Engineer - January 2023- December 2024
I built enterprise budgeting financial systems and created an integrated ecosystem comprising HR, budget management, and ticketing platforms, and an AI commodity trading assistant. My work tackled complex challenges in authentication, complex state management, financial systems, and AI-powered platforms.

Indigobraze Consulting Limited, United Kingdom - Software Engineer/ Consultant - February 2024 - December 2024 - Contract
Contributed to diverse in-house projects, enhancing technical adaptability and problem-solving skills. Developed demo platforms tailored to data analyst trainee requirements. Provided constructive feedback and technical guidance to trainees based on performance assessments.

Geotopup Communication Services - Technical Support Specialist- Nov 2022- February 2024
Provided technical support by resolving product and service-related issues, ensuring prompt and effective solutions to customer complaints. Assisted users with purchases, upgrades, and returns while delivering clear guidance on product functionality and usage. Maintained a customer-first approach to improve satisfaction and retention.

Green Builders Limted - Website Developer/ IT - Technical Support Specialist- Nov 2022- June2023
Developed a functional, SEO-optimized company website to improve online visibility. Managed website content, performed regular maintenance, and implemented user experience enhancements. Monitored and analyzed engagement data to inform ongoing improvements and drive traffic growth.
